

Nobody rides for free.

environmentaland

the interactive environmental theme park

Welcome to Environmentaland, the world's FIRST environmental theme park and museum! Explore the space making stops along the way to take a wild ride that will up your fun and expand your mind.

TRASHed :: Art of Recycling Exhibit:

Check out the redesigned recycling bins all around Environmentaland. Each bin was creatively imagined and painted by renowned pop culture artists. Find your favorite bin and be inspired to conscientiously manage your waste and protect our natural resources.

Desert Mini Golf Course:

Try your hand (and your putting skills) while learning about water resources at our all natural putting green. This is no normal mini golf course - the green has been replaced with rock, sand, and brush. While you play, check out the facts about water conservation and how easy it is to make simple changes that have a real impact.

18 & Up Alternative Energy Golf Carts:

Hop in one of these music inspired, alternative energy outfitted golf carts and imagine yourself zooming down that sustainable golf course, listening to some sweet tunes from your favorite Coachella artists. Each golf cart is inspired by a Coachella 2009 artist and runs on renewable energy, and is accompanied by facts about alternative fuel options.

THINK BIG Mini-Bin Decorating Station:

Like the decorated mini bins hanging on the walls in the sustainable merchandise store? Stop by the mini bin decorating station, and use our paints, glitter pens, and other art supplies to decorate a mini bin of your own. Use them as pen holders or display them as art to remind you to think BIG about how small actions have big results.

The Energy FACTory:

Enjoy the sights and sounds of Environmentaland on a bike, a see-saw, or a hand powered listening station while powering your cellphone, digital camera and more! By riding specially designed Energy Factory equipment, all the energy you produce can be collected and used to generate electricity. While you ride, glance around at our Energy Factory posters that talk about the options, advantages, and disadvantages of conventional as well as alternative energy sources.

Recycled Paper Plane Shoot Out:

Step on up and try your luck... and your paper folding skills! Use our stock of recycled paper, collected from Hollywood & Highland venues, to make a paper plane and aim at our Bullseye Target. Aim for the highest point areas to win cool prizes as well as engage in a little friendly competition.

Portal Potties:

One man's trash is Global Inheritance's treasure! Our Portal Potties exhibit features mobile toilets that have been reimagined and redesigned to make different eras come to life. Learn about musical genres and history along with the importance of reusing past materials to inspire the future.

Planetarium:

Enter our planetarium and engage with an interactive art installation that is as beautiful as it is educational. Use a hand crank inside to power a bulb that radiates the shapes of the constellations onto the inside of the dome, made entirely from recycled paper and other sustainable materials.

WASTed On The Clock:

Do you have a PhD in waste management or are you home schooled? Here's your chance to prove your skills in a 60 second dash to sort out a bin of trash, recycle & compost items. Common sense goes a long way but you'll need some skills also to score a 10!

Sustainable Merchandise:

Shoppers! Browse our Sustainable Merchandise store and find an array of limited edition organic t-shirts, Tour de Energy bikes, and everything from clocks to jewelry made from recycled and eco-friendly materials. All proceeds from the store go to support our non-profit so we can keep Environmentaland and other GI programs up and running.

Organic Challenge

Are you eating a Frankenapple or an Organic Apple? That's a big question. Is that a veggie dog or chicken beak surprise? You'll be blind folded as your taste buds will need to provide the answers.
